

# BARREL SLINGS

P/N: BLRP-716-03 (04,05,06)

## FEATURES

- Custom stainless steel master ring (3+ leg slings) or galvanized pear link (1-2 leg slings)
- Drop-forged alloy steel barrel hooks

## TECHNICAL

- UHMPE is world's strongest fibre by weight
- 22,585 lbs. minimum fibre break strength (7/16")
- Service life 8 of years

## MATERIAL

- 7/16" 12-strand solution dyed UHMPE rope
- Colour-coded Cordura® sheaths on each leg for easy identification and load rigging

## ABOUT

Emergco® barrel slings are constructed from UHMPE 12-strand rope, which is more aerodynamic than flat webbing material, and lighter/more compact than wire rope.

Our Barrel Hooks are dropped forged alloy steel and work together with the overall design to maintain even pressure on the barrels, reducing any potential for the barrels to inadvertently slip out of the hooks when properly rigged.

Each lifting bridle set of 2 Barrel Hooks comes with a rubber bungee strap, and each barrel sling assembly comes with a HD bucket bag and ID tags. Full product user manual and inspection sheets available.

- Constructed with 12-strand UHMPE fiber rope offering high strength, low weight, and longevity
- Emergco® custom designed stainless steel master link on 3+ leg slings for even load distribution and safety
