

PICK-OFF CONNECTOR

P/N: AC01-000-00-00

FEATURES

- Stainless Captive-Eye Carabiner
- Stainless D-Ring and adjuster

TECHNICAL

- Rated load: 300 lb (136 kg)
- Standard Length 24" (61 cm)

MATERIAL

- MIL-W-4088 Nylon Webbing

ABOUT

The Emergco Pick-Off Connector is a versatile HETS™ Accessory for Human External Cargo rescue. Designed as a tool for rapidly securing a victim to a rescuer, the Pick-Off Connector is a valuable component of a HETS™ rescue kit.

In use, the rescuer secures the D-Ring to his or her own harness and clips the captive eye carabiner onto an available loop for stowage. During rescue, the carabiner is unclipped and secured to an attachment point on the victim's harness and then the Pick-Off connector pulled tight. The victim can then be detached from any anchor or structure and flown to safety.

- HETS™ accessory built for securing a victim to a rescuer
- Designed with Emergco's years of experience in rescue & work access
- Stainless steel hardware ensures long service life in harsh environments
