

REMOTE CARGO HOOKS

FEATURES

- Heavy duty extended cage powder coated for durability
- Field replaceable urethane bumper for protection of hook load beam

TECHNICAL

- Pull tested to 5 times rated capacity with no signs of fatigue or failure
- Available in WLL's of 3,000, 6,000, 9,000. and 12,000 lbs.

MATERIAL

- Hook constructed of aircraft grade components and materials
- Wired with cabtire electrical cable secured to the cargo hook guard

ABOUT

These remote cargo hooks are designed for maximum reliability, durability, and everyday use to ensure no down-time for the operator. The MS cargo hook series have proven to be one of the most robust external load products being used in long line operations around the world.

The rugged construction, low maintenance, and compact size of these hooks make them an ideal remote cargo hook for all helicopter weight classes.

The 301 has a new Emergco designed and manufactured extended frame cage. The flat bottom and wide leg design protects the load beam while conducting longline operations in broken and rocky terrain. Powder coated in a bright yellow for improved visibility.

- Large throat allows easy loading by ground crews
- Hooks can be configured with a variety of electrical connectors as specified by the user
- Model 301 available in a dual-hook configuration
