ABOUT

The Emergco Restraint Lanyard is an essential HETS™ Accessory for Human External Cargo operations with a 2nd Essential Crew Person (ECP) in the aircraft. Two snap connectors clip to anchor points within the aircraft, and the double-leg design allows quick and easy adjustment to ensure safety and proper ergonomics.

Restraint lanyards are fully approved for use with the HETS™ system and come serialized with a stow bag for easy identification in the field

- HETS™ accessory built for securing Essential Crew Person (ECP) inside an aircraft
- Double-leg with dual adjuster design allows for quick positioning within the aircraft
- Fully approved and proven in use
